Hello!

I read through the proposed cleanup plan and I have a couple of concerns about the proposed remediation. I'd like to see more of the contaminated sediment being removed and I'd like to see what sediment is removed not be sent to a confined disposal facility. This is just pushing the burden of treatment on to our grandchildren. I'd also like to see this plan changed to include making the fish from the water edible again. Please clean up the river so that the Fish Consumption Advisory can be removed.

Thanks,
